

Our Engineering Department is prepared to supervise any installation of equipment / systems that are part of our line of supplies,

- In New Buildings at Brazilian Shipyards
- In existing Vessels in the replacement of faulty equipment, or already inadequate due to the continual development happening in Marine Electronics (retrofit)
- In existing Vessels, requiring adequate equipment, or installation of new systems for special operations, fulfilling technical specifications required by Petrobras or other Customer who contracts the vessel.

Installation and Supervision Services can be performed anywhere, even outside Brazil.
